📍 Jaipur, Rajasthan

## SUMMARY

Computer Science graduate focused on full-stack web development, with hands-on experience building and deploying live web applications using JavaScript, PHP, MySQL, Bootstrap, and REST APIs. Built QR-based ordering systems, admin dashboards, API-driven Android apps, and responsive business websites with real deployment experience on custom domains.

## SKILLS

### Languages

C++, JavaScript, PHP, Python

### Web

HTML, CSS, Bootstrap, React.js basics

### Database Management

MySQL

### Concepts

REST APIs, CRUD operations, responsive design, admin dashboards, order management workflows

### Tools

Git, GitHub, VS Code, Figma, Excel

### Deployment

DNS configuration, domain setup, production hosting

## TRAINING & WORKSHOPS

### Data Analytics with tableau Workshop, Jaipur

03/2023

- Learned Tableau dashboarding and data visualization techniques using real-world datasets.
- Created dashboards to convert raw data into actionable visual insights.

### Internet of Things Workshop, Jaipur

11/2022

- Built IoT prototypes and integrated them with cloud-based communication platforms.
- Learned practical applications of sensors, embedded systems, and cloud-based IoT communication.

## PROJECTS

### Cafe Ordering Web App

- Developed and deployed a QR-based cafe ordering platform supporting dine-in table ordering and public takeaway orders.
- Built customer order flow including menu browsing, cart management, order confirmation, and payment selection.
- Built an admin dashboard to manage live orders, menu categories, table activity, and popular item tracking.
- Implemented table-specific URL sessions so each QR scan automatically maps the customer order to the correct dine-in table.
- Deployed the application on a live domain with DNS/server configuration and production hosting setup.
- Designed MySQL-backed order and menu flows for cart handling, order confirmation, admin updates, and order status tracking.
- Configured production hosting, DNS records, and live domain deployment for public access.

### News App (Android, REST APIs)

- Built an Android news app that fetches real-time articles from external REST APIs and displays category-wise news in a structured mobile interface.
- Parsed API responses and rendered dynamic article data including headlines, descriptions, images, and source details.
- Designed XML-based screens for category browsing, article reading, and smooth navigation across sections.
- Added local state handling for saved content and user interactions.
- Improved readability using structured layouts, clear hierarchy, and mobile-first UI design.

### Natural Beekeeping Business Website

- Developed and deployed a responsive business website for a natural honey and beekeeping brand to showcase products, services, and brand story.
- Built product-focused landing sections for honey offerings, sustainability messaging, customer trust, and inquiries.
- Used HTML, CSS, JavaScript, and Bootstrap to create mobile-friendly layouts across devices.
- Added contact and inquiry sections to support customer communication.
- Configured hosting and DNS for live domain deployment.

## ACHIEVEMENTS & EXTRACURRICULARS

### Logistics Manager

- Managed event logistics for 300+ participants, reducing setup time by 20% through improved coordination, resource planning, and budget utilization.

## EDUCATION

### Bachelor of Technology in Computer Science Engineering

Swami Keshvanand Institute of Technology, Jaipur

2021 – 2025

### High school Graduation

St. Paul's Sr. Sec. School, Banswara

2007 – 2020
