Database Management

MySQL

PROJECTS

News App (Android, REST APIs)

- Built an Android news application that fetches and displays real-time news articles from external APIs.
- Developed structured UI components using XML layouts to ensure responsive and clean user experience.
- Implemented REST API integration for dynamic content updates from online news sources.
- Added user data storage functionality to manage user interactions and app data.

Natural Beekeeping Business Website [🔗](#)

- Developed a responsive website for a beekeeping startup to present honey products and services online.
- Designed structured UI components including product cards, service sections, and testimonial layouts.
- Implemented modern responsive design ensuring compatibility across mobile, tablet, and desktop devices.
- Utilized HTML, CSS, JavaScript and Bootstrap to build a clean and user-friendly interface.
- Integrated contact forms for customer inquiries

Experience

Data Analytics with tableau Workshop, Jaipur

03/2023

- Acquired advanced data visualization and dashboarding techniques using Tableau, applied to real-world dataset.
- Tableau dashboarding techniques, transforming raw data into actionable insights
- Held at Swami Keshvanand Institute of Technology

Internet of Things Workshop, Jaipur

11/2022

- Workshop focused on IoT technologies and their applications.
- Built IoT prototypes and learned integration with cloud-based platforms Innovated IoT prototypes and integrated cloud-based communication systems.
- jointly organised by departments of Electronics and communication engineering and Computer science engineering.

Achievements & Extracurriculars

Logistics Manager

- Spearheaded logistics for the "Horror Room" event, streamlining operations for 300+ participants, cutting setup time by 20%, and optimizing budget utilization.

Education

Bachelors of Technology (CSE), Swami Keshvanand Institute of Technology, Jaipur
Expected

04/2025

High school Graduation, St. Paul's Sr. Sec. School, Banswara

2007 – 2020
