SUMMARY

Computer Science graduate focused on full-stack web development, with hands-on experience building and deploying live web applications using JavaScript, PHP, MySQL, Bootstrap, and REST APIs. Built QR-based ordering systems, admin dashboards, API-driven Android apps, and responsive business websites with real deployment experience on custom domains.

SKILLS

Languages

C++, JavaScript, PHP, Python

Frontend

HTML, CSS, Bootstrap, Responsive Design, React.js Basics

Backend

PHP, REST APIs, CRUD Operations, Authentication Basics

Database

MySQL, Database Design, Query Handling

Tools

GitHub, VS Code, Figma, Excel

Deployment

DNS Configuration, Domain Setup, Production Hosting, Server Deployment

Core Workflow

Admin Dashboards, Order Management, Menu Management, API Integration, Database-Backed Applications

EDUCATION

Bachelor of Technology in Computer Science Engineering

Swami Keshvanand Institute of Technology, Jaipur
2021 – 2025

Senior Secondary Education

St. Paul's Sr. Sec. School, Banswara
2007 – 2020

PROJECTS

Cafe Ordering Web App

- Built and deployed a QR-based cafe ordering platform supporting dine-in table orders and public takeaway orders.
- Developed customer ordering flow for menu browsing, cart management, order confirmation, and payment selection.
- Built an admin dashboard to manage live orders, menu categories, table activity, order status, and popular item tracking.
- Implemented table-specific QR URL sessions so each customer order automatically maps to the correct dine-in table.
- Designed MySQL-backed workflows for cart handling, order confirmation, menu updates, admin updates, and order status tracking.
- Configured DNS records, production hosting, and live domain deployment for public access.
- Configured QR ordering flow for 7+ dine-in tables with table-specific order tracking.

News App (Android, REST APIs)

- Built an Android news app that fetches real-time articles from external REST APIs and displays category-wise news.
- Parsed JSON API responses and rendered dynamic article data including headlines, descriptions, images, and source details.
- Designed XML-based screens for category browsing, article reading, and smooth navigation across sections.
- Added local state handling for saved articles and user interactions.
- Improved readability using structured layouts, clear visual hierarchy, and mobile-first UI design.

Natural Beekeeping Business Website

- Developed and deployed a responsive business website for a natural honey and beekeeping brand.
- Built product-focused landing sections for honey offerings, sustainability messaging, customer trust, and inquiries.
- Created mobile-friendly layouts using HTML, CSS, JavaScript, and Bootstrap.
- Added contact and inquiry sections to support customer communication.
- Configured hosting and DNS for live domain deployment.

TRAINING & WORKSHOPS

Data Analytics with tableau Workshop, Jaipur

03/2023

- Learned Tableau dashboarding and data visualization using real-world datasets.
- Created dashboards to convert raw data into actionable visual insights.

Internet of Things Workshop, Jaipur

11/2022

- Built IoT prototypes using sensors, embedded systems, and cloud-based communication platforms.
- Learned practical IoT workflows involving device data collection and cloud communication.

ACHIEVEMENTS & EXTRACURRICULARS

Logistics Manager

- Managed event logistics for 300+ participants, improving coordination, resource planning, and execution efficiency.
- Reduced setup time by 20% through better team coordination, scheduling, and resource allocation.
